OPTIMATE™ ENERGISE HELPS WITH

- Increasing macros and trace elements in their diet
- Providing prebiotics and probiotics
- Providing pre-calving support for dairy cows

WHY USE OPTIMATE™ ENERGISE?

- Pre-calving blend for dairy cows
- Prebiotics and probiotics to assist with maintenance and productivity of dairy cows
- Essential mix of macros and trace elements designed for the transition period of dairy cows

INGREDIENTS

Per 300gm dose includes:

- Kemin® CLOSTAT®
- Diamond V® Original XPC™
- Macro minerals: Magnesium 21.7gm, Sulphur 18.2gm, Calcium 16.1gm, Phosphorus 2.1gm
- Trace minerals: Copper 125 milligrams, (protected/organic) Cobalt 25 milligrams, Zinc 850 milligrams, Selenium 10 milligrams, Iodine 32 milligrams
- Contains NZ natural Aluminosilicate as an inactive carrier

WHAT IS OPTIMATE™ ENERGISE?

- **Optimate™ Energise** has the added benefit of Kemin® CLOSTAT® probiotics, macros and trace elements. Kemin® has identified and selected Bacillus subtilis PB6 as an active substance that helps maintain the balance of microflora in the intestinal tract of livestock.
- **Optimate™ Energise** has the added benefit of Diamond V® Original XPC™ Saccharomyces cerevisiae. Diamond V® Original XPC™ products represent “the one-and-only original” in the field of fermentation products for animal nutrition and health. Validated by extensive peer-reviewed research. Original products continue to provide the best return on investment in the market today.

DIRECTIONS FOR USE

- Feed **Optimate™ Energise** to dairy cows only, 21 days pre-calving, at a rate of 300gm per cow, per day
- Do not feed to in-milk dairy cows
- Ensure **Optimate™ Energise** is thoroughly blended through the feed
- Suitable with maize and grass silage, PKE, meal and grain blends, Tapioca, Silage or DGG
- Before changing rations seek nutritional advice
